

Quadrox Exception Reporting — Be Present at Every Exception or Transaction

QER uses exception based reporting methods to easily identify, track, and respond to unusual point-of-sale activity — everything from voids and employee discounts to free samples sale. QER identifies trends associated with key performance indicators and automatically sends alerts to investigators or other designated personnel. Suspicious transactions can be identified at store, departmental or corporate level, regardless of whether the shrinkage is due to intentional fraud or innocent non-compliance.

Increase the Productivity of Your Business

QER will have an immediate impact on profitability, operational efficiency, and employee productivity. QER is the first solution in which security video is seamlessly blended into the QER exception reporting making auditing highly efficient. QER allows you to be where you are not. Every transaction can be visualized through high quality video footage.

Identify Patterns and Areas of Potential Loss

Court admissible evidence can be retrieved with a single click. It allows you to review the transaction as it effectively took place in the store. Exported video incidents blended with POS data become interactive training tools without any requirement for video editing skills.

Key Benefits:

- identify employee fraud and collect court-admissible video evidence
- resolve compliance issues and identify training issues early and easily
- improve operational deficiencies, enforce process compliance
- provide easy access to queries by field and store staff
- measure operational performance
- year on year payback - ROI within 6 months
- significantly reduce losses and protect margin

Profitability through Prevention

Collecting data from all EPOS systems centrally, Quadrox Exception Reporting offers one view of the organisation. This enables auditors to detect multi-store fraud that may not show up in one store's data and allows the store management to stay focused on their job. A central investigative solution, QER offers an automated analytic approach to maximise the efficiency of a central auditing team and support a company-wide management strategy to Loss Prevention.
