Robedikappa Uses CCTV for Security & Promotion

Robedikappa is an international fashion company with stores worldwide including Belgium, Brazil, Canada, Germany, Italy, Japan, Spain and the U.S.A.

Robedikappa does a lot on promotion through their website. Keeping the site updated however is a very time and cost intensive activity.

Video Surveillance

A quality fashion store like Robedikappa is vulnerable to theft and therefore a CCTV installation is very useful. With WebCCTV NVR-Q8 (8 camera's) all activities in the shop can be monitored locally and remotely.

Web Publishing

For promotional purposes Robedikappa also uses WebCCTV NVR to transmit the images of 4 of the 8 cameras to their WebCCTV NVR. By doing this, the latest fashion in the shop is also on their website, customers can also see if the shop is open or closed.
