1. Introduction

Quadrox Mobile is an application for iPhone and iPad designed for streaming video and recordings from **Quadrox WebCCTV/QGuard** servers.

2. Installation

Quadrox Mobile can be downloaded for free from the Apple AppStore Link on **iTunes**: https://itunes.apple.com/us/app/Quadrox Mobile/id763433258

The App can be easily found using the search term "Quadrox" or "Quadrox Mobile".

3. Server configuration

Before you begin using the **Quadrox Mobile** app, you should configure your **Quadrox WebCCTV/QGuard** server. **Quadrox Mobile** connects to the server, using a special account on the server. Your Administrator's credentials will not work in the App.

To configure the server, please, do the following:

1. Log-in to the Video Manager on the server.

Security che	:k			8
	Please ent	er your Login	and Password.	
Login:				
Password:				
	OK	Cancel	Options >>	

2. Go to "Users".

There you will see "Mobi" user in the list. This user specifically exists for access from mobile devices. If you remove it, access to the server will be impossible. In this case you have to create a user with the same name again.

3. Press "Edit" button according to Mobi account.

After installation the server assigns a randomly generated password to the **"Mobi"** account. You need to change this password.

Provide new password, password confirmation and press "Finish".

4. App overview

After **Quadrox Mobile** was downloaded and installed on your device, you will see the Quadrox icon among your Apps. Tap on it and **Quadrox Mobile** will start.

The splash screen will appear, showing the version number.

Tabs:

Contains list of mosaics with live streams from cameras

Shows recorded video from selected camera

Contains list of Quadrox servers, added to app.

5. App configuration

After first start, App contains no configured servers. You will be directed to the "Servers" tab and a server configuration dialog will appear.

Server con	nection	data	
Name			
IP address or doma		Port (80))
Password			
s	ave		
<u> </u>		0	
Live Bec	ordinas	Servers	

Fulfill all required fields:

- 1. Name: enter any friendly name for your server.
- 2. IP address or domain: enter IP or domain name of your server.
- 3. Port: enter port number (80 used by default).
- 4. Password: enter the same password you used previously configuring the "Mobi" account on server side.

Press "Save". The server will appear in the list. You can add more pressing "+" button.

6. Live view

Until a camera is added to the mosaic, you will see a hint helping you to operate the mosaic. Hold your finger on a black area as suggested and a list of available cameras on the server will appear. Choose the camera.

When using mosaics with multiple cameras, you can zoom-in and zoom out each camera in the mosaic. Just tap on the selected camera and the image will be maximized. The camera name will appear on top. Tap again to go back to the mosaic.

7. Recordings playback

Go to the **"Recordings"** tab. You will see a default hint about adding a camera and highlighting its name. Choose the camera, holding your finger on the black field. Video will not appear until you select the starting time of the recorded video. Tap on **"Select time"**, choose the start date and time and press **"done"**. Playback will start from the date and time you have set. If there is no recorded video from the required time, you will see the movie, which date and time are closest to the selected.

Note that the time of the video recording you are setting in Quadrox Mobile is the time of the server. Consider this when your mobile device and server are placed in different time zones.

8. Removing mosaics and servers

If you need to remove any mosaic or server just drag the line you want to remove to the left. You will see the "Delete" button. Tap on it. Server or mosaic can be added again using "+" button.
